

Patient's Name : Pravin Hate

Ref.No. : HL-2494-22

Age/Sex : 32 Years /Male

Reg. Date : 10/06/2022 13:39

Referred by : C/o. Dr At Doorstep

Collection. Time : 10/06/2022 12:40

SEROLOGY

HIV I & II : Negative

HBSAG : Negative

HCV ANTIBODIES : Negative

CORE ANTIGEN

Method : By Immunochromatography.

N.B. : Before firm clinical opinion is made, Confirmatory Tests like TRIPLE - ELISA / WESTERN BLOT are recommended.
In Window period, the non-reactive test should be repeated after a few days. The sensitivity of this test kit is 99.5% and specificity is 99.75%

TEST FOR SYPHILIS

SPECIMEN : Serum

RAPID PLASMA REAGIN TEST (RPR)

METHOD : Chromatography

RESULT : Non reactive

TITRE :

Qualitative and semiquantitative screening test for reagin antibodies - similar in principle to classical VDRL test
Certain conditions give false positive , hence positive samples must be confirmed with specific tests like TPHA
(Treponema Pallidum Haemagglutination Test or FTA (Fluorescent Treponemal Antibody Test).
Low concentration in case of early infection or latent stage of disease may give false negative reaction. In strong
suspicious case confirmation by specific tests is advisable.
